

Cementation in Dental Implantology

By Chandur Wadhvani

Springer-Verlag Gmbh Jan 2015, 2015. Buch. Book Condition: Neu. 261x182x17 mm. Neuware - Treatment by means of dental implants has become increasingly common, but it is now recognized that cementation during the restorative phase can be the source of significant problems. This book examines in detail the issues associated with cementation in dental implantology, with a particular focus on residual excess cement and its consequences. It provides reliable guidance on cement selection and use on the basis of the latest scientific research. Among the topics addressed are microbial aspects of cement selection, new abutment designs, aesthetic considerations, margin placement and the role of radiography. The relation of peri-implant disease to residual excess cement is explored in depth and alternatives to the cementation process are also considered. All of the chapters have been written by leading experts in restorative and surgical dental implantology. The information supplied is guaranteed to change the way in which the dentist thinks and practices. 202 pp. Englisch.
