

Advanced Mathematics for Economists: Static and Dynamic Optimization

Filesize: 2.12 MB

Reviews

Merely no phrases to describe. Better than never, though i am quite late in start reading this one. Its been written in an extremely easy way which is merely following i finished reading this publication through which in fact transformed me, change the way in my opinion.

ADVANCED MATHEMATICS FOR ECONOMISTS: STATIC AND DYNAMIC OPTIMIZATION

To download **Advanced Mathematics for Economists: Static and Dynamic Optimization** eBook, you should refer to the web link beneath and download the file or have access to other information which are related to **ADVANCED MATHEMATICS FOR ECONOMISTS: STATIC AND DYNAMIC OPTIMIZATION** ebook.

John Wiley and Sons Ltd. Paperback. Book Condition: new. BRAND NEW, Advanced Mathematics for Economists: Static and Dynamic Optimization, Peter Lambert, This book contains a compact, accessible treatment of the main mathematical topics encountered in economics at an advanced level, moving from basic material into the twin areas of static and dynamic optimization. Nearly half of the book is devoted to a survey of univariate calculus, matrix algebra and multivariate calculus. This fundamental material is made vigorous by the inclusion of a variety of applications. The later chapters focus on the Lagrange multiplier technique: when it will work, why it works and what economic insights it yields. The properties of maximum value functions and duality are explored, as are the Hamiltonian conditions for dynamic problems in the optimal control format. Dynamic programming and the calculus of variations are also covered. Much of the discussion proceeds at a heuristic level and by worked example, but the theorems and proofs required by the most analytical user are also to be found. The underlying message is that the language of mathematics can be productive, giving expression to the ideas and facilitating approaches from which insights flow that may be hard to come by in other ways. The book will be particularly useful for final year undergraduates doing mathematics for economists courses, and postgraduate students.
