The cost of corrugated iron housing is the same as quoted for steam cranes at page 21. At a slightly increased cost a steam capstan can be fitted for dragging stones in quarries, moving trucks, c., or the construction may be modified to admit of one or more Goliaths being driven by a line of shafting in a similar manner to that employed for driving the Overhead Power Travellers, described at page 69. This arrangement has been adopted on works for constructing the heavy concrete or beton blocks now so generally used for breakwaters and harbour work, the power being taken from the engine used for working the concrete mixers and block-making machinery; and the cost is from 10 to 15 per cent, lower than for Goliaths having their own engine and boiler. STEAM CRANE ON GOLIATH. Another modification is to have a steam...
