By Robert Brunton

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 28 pages. Dimensions: 9.3in. x 7.5in. x 0.2in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1825 Excerpt: . . . point. For example, the length of a rod being 20 feet, and the weight of a foot in length equal to 100 oz.; also a weight or ball fixed at under end weighing 1000 oz.; at what point of the rod from the point of suspension will be the centre of percussion The weight of the rod is 20 X 100 2000 oz. which multiplied by half its length 2000 X 10 20000, gives the momentum of the rod. The weight of the ball 1000 oz. multiplied by the length of rod 1000 X 20, gives the momentum of the ball. Now the weight of the rod multiplied by the square of the length, and divided by 3 2000 X 202 -, , , , , , s 266666, the force of the rod, and the weight of the ball multiplied by the...

Reviews

A very amazing ebook with lucid and perfect answers. it was actually writtern quite flawlessly and useful. Its been written in an exceedingly basic way and it is simply right after i finished reading this publication in which basically changed me, change the way i really believe.

-- Garett Stanton

Very useful to all of group of folks. I could possibly comprehended every little thing using this created e book. You wont truly feel monotony at anytime of your time (that's what catalogs are for concerning in the event you ask me).
