Brand New Book ***** Print on Demand *****.Master s Thesis from the year 2013 in the subject Geography / Earth Science - Oceanography, grade: A (91/100), Xiamen University (Coastal and Ocean Management Institute), course: Marine Affairs, language: English, abstract: The geodynamics of the coastal stretch naturally serve as a convergence point for anthropogenic settlements world-wide. On a global scale, coastal areas occupy 20 percent of the Earth s surface, yet they harbour approximately 50 percent of human population living within 200 km of the coast (UN, 2002). The continuous occupancy of the coastal milieu with limited resources and increasing economic hardship has resulted to uncoordinated spatial layout of urban settlement, termed urban sprawl. Urban sprawl, though not a new phenomenon, remains a challenge for most decision makers of the world, of which, Cameroon is not an exception. The challenge is further compounded by the fact that sprawl is not well circumscribed as there is no universally accepted definition for it. This paper, therefore, addresses the socioeconomic and environmental implications of urban sprawl on the coastline of Douala-Cameroon by making use of qualitative and...
